

## Installation Guide

July 19, 2005

### Price Setter – Expanded Auto Price Levels – v1.0 For Retail Pro® v8.40 and Above

#### Overview

---

The M&M Price Setter sets inventory price levels automatically when the Inventory Price, Cost or Vendor List Cost is changed in inventory or by using Price or Cost Adjustment Memos.

The Price Setter only affects Price Levels 2 – x (where x is the number of price levels in the system).

Price Levels can be set in one of three ways: based on Price Level 1, based on Inventory Cost or based on Vendor List Cost.

In addition, the modification can generate price adjustment memos if desired.

The modification is installed at the Retail Pro Main only.

#### Licensing

M&M's Price Setter mod is licensed by User ID. The license must be for the Retail Pro User ID.

**When you receive the license files, they should be installed in the 'plugins' directory under the 'Retail' directory. M&M recommends that you also keep a copy of the original license file in another directory on the end-user's system.**

**The Price Setter License File will be named MME-PRICESETTR-[UserID]-[FileCode].lic.**

**If you are installing Drop Ship Customer for evaluation or demonstration using dealer key 1001 or 1888, no license file is required.**

#### Installation

---

Use the contents of the MMPriceSetter-VVvv.zip file.

The MMPriceSetter-VVvv.zip file contains:

- MMPriceSetter.bpl – The Price Setter plug-in.
- PriceSetter.bmp – Bitmap file.
- Price Setter Install Guide – This installation manual.
- Price Setter User Manual – User manual.

#### 1. Install Files

---

##### MMPriceSetter.bpl and PriceSetter.bmp

If there is no 'plugins' directory under the Retail directory on the Main, create one.

Extract the MMPriceSetter.bpl and PriceSetter.bmp files from the zip and copy to the plugins directory.

## **2. Copy License File**

---

Copy the end-user license file to the plugins directory.

M&M recommends that you also keep a copy of the original license file in another directory on the user's system.

The license file is emailed to you when you purchase a license on the M&M web site.

**You do not need a license file for dealer keys 1001 and 1888.**

## **3. Check Desktop Shortcuts**

---

If Retail Pro is started using a desktop shortcut, do the following at the Main and EVERY workstation on the Main:

- 1) Right click the shortcut on the desktop.
- 2) Click Properties.
- 3) Check the "Start In" directory for the shortcut. If it is not set to the location of the Retail directory, change it. Enter the full path (using drive letter) to the Retail directory.

NOTE: On workstations, the path must use the mapped network drive from the workstation to the Main.

**INSTALLATION IS COMPLETE.**
