

User Manual

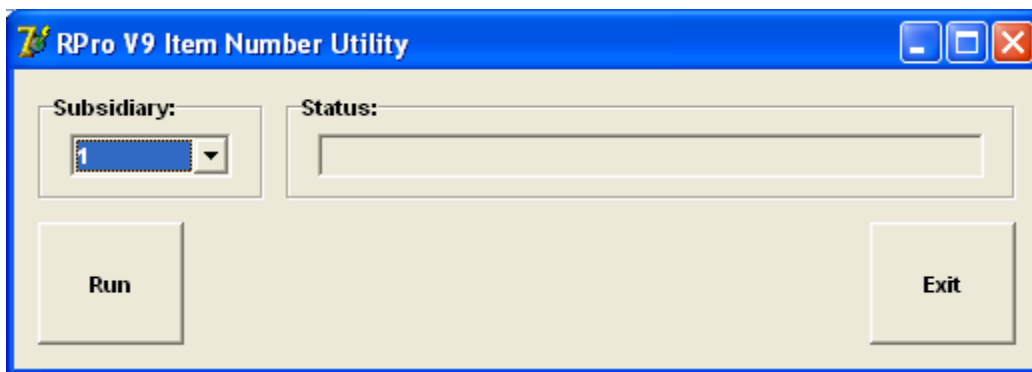

M&M RPro V9 Item Number Plugin and Utility For Retail Pro® 9 Series

Overview

The modification consists of a plugin and utility program.

MMItemNum.exe Utility

Use the MMItemNum.exe utility to set item numbers for items without item numbers.

Start the utility and select a Subsidiary.

Click Run. The utility will set item numbers for any item without an item number.

MM9ItemNum.dll Plugin

Operation of the plugin is transparent to the user.

When an item is saved (either a new item or updated item), if it does not have an item number, the next sequential item number is assigned.

IMPORTANT NOTE: Item numbers are assigned by Subsidiary.
