Fingerprint Login v1.xx

For Retail Pro v8.51 and Above

Fingerprint Login

If you have a Retail Pro password for your User Name, you should use the password as you would normally.

Otherwise, when you log in, you will see the Scan Fingerprint screen:

Follow the directions and place your finger on the scanner. Use the same finger that was used when you registered your fingerprint.

If the scan is not successful, the "Incorrect Login" message will be displayed. Otherwise, the login will be successful.
